

## English

We will be using research techniques to find out about prominent Indians and their lives leading to writing a mini-biography. To ensure we are fully prepared for Year 5 we will be working on a selection of smaller but tricky GPS areas – this will help build the quality of our written work as well as adding to our bank of knowledge for English.

## Qu'est-ce que tu aimes ?

## Computing

We will be using our computing time to practise and extend our techniques of research and being able to evaluate good sources of information.

## Art, Design & Technology

We will be making Tudor collages to decorate the corridor and help us understand what makes a good collage.

## French

We are always extending our knowledge of French vocabulary and in the last term of Year 4 we will be extending our knowledge of the vocabulary of food as well as developing our understanding of French vocabulary which will help us well into our French future.

## Mathematics

We will be extending our knowledge of different maths strategies focusing on long and short multiplication and short division. We will also be revisiting shapes, angles, areas and perimeters. As the term draws to a close we will be doing a series of investigations which will draw on the whole range of our maths knowledge.

## P.E.

We will be going swimming each Wednesday afternoon and working on our swimming techniques. We will also be doing athletics on the field and preparing for sports day.

# Year 4 Term 6 2019

## History

Having spent Term 5 finding out about the main themes of the Tudors in History, we will be looking under the surface of Tudor life and finding out more detail about various areas of daily life, including housing, education, families and food. This will link well with our trip this term.

## PSHE & RE

In RE we will be looking at Hinduism and finding out more about the major events in the Hindu calendar. During our PSHE sessions we will be exploring the theme of friendships and looking to develop our strategies of how to maintain friendships as we grow and change.

## Music

Oxford Voice and Instrument Programme.

## Science

Our topic this term is sound. We will explore how sounds are made, vibration, pitch and loudness using musical instruments, find patterns and explore the relationship between sound and distance.
